Education

Concordia University Montreal, QC

Bachelor of Engineering, Software Engineering (Co-op) *2025 – Expected 2028*

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming I & II, Web Programming, System Hardware, Mathematics for Computer Science

Experience

Software Engineering Intern Sept. 2026 – Dec. 2026

Agri-Neo *Toronto, ON*

- Cut remote HMI access time from ∼**5 minutes to ∼10 seconds** by automating an **8-step workflow** (Ewon eCatcher + TightVNC) into a one-click launcher using Java Access Bridge and PowerShell
- Rolled out the launcher to the team, where it is now used daily for remote HMI access
- Drove Ewon eCatcher, a Java/Swing app invisible to standard Windows UI Automation, by writing a Java Access Bridge layer that controls it programmatically
- Fixed 32-bit/64-bit interoperability failures and added connection monitoring and recovery logic so automated remote sessions stay reliable
- Assessed cybersecurity risk across **30+ IT/OT assets**, from Allen-Bradley PLCs and PanelView HMIs to Ewon gateways, engineering workstations, and remote-access systems

Laboratory Assistant Oct. 2023 – Feb. 2024

Concordia University *Montreal, QC*

- Set up laboratory equipment, supported experimental data collection, and kept technical records organized

Projects

Interactive Retro Desktop Portfolio | *React, TypeScript, Node.js, PostgreSQL* 2026

- Designed a desktop-OS-style portfolio in React and TypeScript with draggable, resizable, minimizable windows, focus management, nested file navigation, and responsive layouts
- Shipped a browser game with custom physics and a Node.js/Express REST API backed by PostgreSQL that validates, stores, and ranks leaderboard scores

ATOMS E-Commerce Platform | *Shopify, JavaScript, HTML, CSS* 2026

- Maintain the Shopify storefront for a Montreal chemical manufacturer serving ∼**100 customers per day**, covering product, inventory, and online sales workflows
- Customized responsive storefront components and product pages in JavaScript, HTML, and CSS

Leadership & Extracurriculars

Director of Competitions Sept. 2025 – Present

Women in Engineering, Concordia University *Montreal, QC*

- Ran EcoInnovate, a Concordia–McGill engineering case competition with **300 participants**, raising **thousands of dollars** through sponsorship while leading recruitment and logistics
- Partnered with IEEE Concordia to deliver FormulaWIEEE, a multidisciplinary engineering competition of **200 participants**, managing sponsors, promotion, and event-day logistics

Technical Skills

Languages: TypeScript, JavaScript, Java, Python, C, SQL, Clojure

Frontend: React, Tailwind CSS, HTML Canvas, Web Audio API, Motion

Backend & Databases: Node.js, Express.js, REST APIs, PostgreSQL

Tools & Systems: Git, GitHub, Vite, PowerShell, Java Access Bridge, Allen-Bradley PLCs, PanelView HMI, Ewon Talk2M, TightVNC

Spoken Languages: English and French (Fluent), Arabic (Conversational)
